INDEX

Eugenics Quarterly, Volume 15, 1968

ABO Blood Groups: in first-born and later-born children (abs.), 305

Adams, Morton S., 227–234

Adjective Check List: used to compare co-twins, 36, 39, 40

Admixture: identified, 76

After Eighty Years, 297

Agarwala, S. N., 41–50

Agathogamy: identified, 76

Age: homogamy for, in Ramah Navaho Indians, 138; and marriage in Venezuela, 179–182 *passim;* and consensual unions, in Venezuela, 179–182 *passim;* chiasma frequency and maternal, in mammals (abs.), 218; effect of female, at marriage, on birth rate, 293. *See also* Mother's Age

Alexandrov, V., 204–206

Alström, C. H., 146–147

Amaurotic idiocy: myoclonic variants of familial (abs.), 219

American Eugenics Society: Minutes of 1967 Annual Meeting of, 55

Amines and Schizophrenia, 57–58

Anderson, V. Elving, 113–127

Ann Arbor (Mich.): assortative mating for physical characteristics in, related to fertility, 136–138

Anthropological types: assortative mating for, in Polish families, 135–136

Arriaga, Eduardo E., 177–190

Assortative mating: and inbreeding, 29, 32, 76, 85–86; interest of biological scientists in, 71–73; and genetic variance, 71; and character of gene pool, 72; social scientists' interest in, 72–73; geneticists' definition of, 73; interaction of heredity and environment in, 74–75; genotypic, 76; phenotypic, 76; consanguine, 76; conjugal, 76; negative, 76; positive, 76; terms associated with, 76; and social homogamy, 78–79; and fertility, 83, 98–112, 120–125, 128–135, 136–138; effect of, on homozygosity, 85; causes of, 85, 117; affecting variance, 85–86; and gametic phase disequilibrium, 86; mathematical model, for a single locus, 86–89; and deafness, 89; model for simple multifactorial trait, 89–91; model for multiple alleles, unequal gene effects, and unequal gene frequencies, 91–92; model for effect of dominance and environment on, 92–94; model for effect of, on correlation between relatives, 94–97; by educational attainment, 98–112; review of studies on, 113–117; and propinquity, 114; and religious affiliation, 114; and attitudes regarding family relationships, 114; and sociological and personality traits, 114–115; IQ differences in, 115; and number of siblings of mates, 116; for mental retardation, 117; for schizophrenia, 117; by intelligence, 120–125, 125–126; for stature, 128–135; for anthropological types, in Polish families, 135–136; for physical characteristics, 136–138; for measurements of body size, 138; genetic effect of, 141; definition of, 142. *See also* Mate selection

Bajema, Carl Jay, 198–203

Basavarajappa, K. G., 293–295

Behavior: similarities of, in co-twins, 34–35, 36; effects of the albino gene upon, of mice (abs.), 66; some evolutionary implications of (abs.), 66; genotypic change affecting conclusions regarding the mode of inheritance of elements of (abs.), 219

Behavior, 208–209

BIOSIS: releases microfilm file, 207

Birth: effects of timing of first, 252. *See also* Fertility

—control. *See* Contraception; Family planning; IUCD

—rates: forms of age-specific, by orders of, in India, 264

Bojnová, V., 273–276

Boston (Mass.): twin study conducted in, 35–40 *passim*

Brown, W. M. Court, 211–212

Buckton, K. E., 211–212

Cacogamy: identified, 76

Canada: levels of inbreeding in, 28, 32

Cancer Research Symposium, 296

Caucasians: congenital defect frequencies among, 228 *passim*

Causes of Blindness in Childhood, The, 209

Cell: cytoecological researches into protective mechanisms of, 204–206

Census counts: accuracy of, in U.S., 173–176

Chandrasekaran, C., 264–272

Chemical Senses and Nutrition, The, 209–211

China: strategies to raise Mother's Age in, 254

Chromosome: abnormalities in lymphocytes from normal human subjects (abs.), 153; population-geographical study of diseases, in man (abs.), 153

Chromosome, The. Structural and Functional Aspects, 301

Chromosome Studies on Adults, 211–212

Chromosome Techniques: Theory and Practice, 149–150

Cold hardening: in plant cells, described, 205

Congenital defects: developmental "noise" and (abs.), 68; in the newborn in Bombay (abs.), 219, among American Indians, 227; comparison among races, 228; of musculo-skeletal system, 228; of cardiovascular system, 230; of digestive system, 231; of nervous system, 231; of ear, 232; multiple, 232; etiological factors in, 233

Consensual unions: trends in, in Venezuela, 179–182; dissolution of, in Venezuela, 186–188

Contraception: IUCD experiment in India, 41–50; methods of, in India, 42, 47. *See also* Family planning

Crow, James F., 85–97, 141–143

Current Population Survey: data from supplement of, 2

Cybernetics: importance of, in biology, 144

Cystic fibrosis: possible causes of, 195

Cytoecology: researches of, into cell mechanisms, in USSR, 204–206

Czechoslovakia: relationship of growth, stature, and heterosis in, 275

DEAFNESS: effects of assortative mating on, 89

Defendi, V., 302

Denmark: twin registry in (abs.), 306

Dermatoglyphics: of childhood schizophrenia (abs.), 306

Diabetes in Sweden: A Clinicostatistical, Epidemiological, and Genetic Study of Hospital Patients and Death Certificates, 212–214

DNA: formation of covalent circles of lambda, by *E. coli* extracts (abs.), 153

Dobzhansky, Theodosius, 215–216

Down's Syndrome: and infectious hepatitis (abs.), 218

Dubinin, Nikolai, 144–145

Dublin, Lewis, 297

Duncan, Otis Dudley, 1–11

ECKLAND, BRUCE K., 71–84

Ecology. *See* Cytoecology

Educational attainment: contributory factors, 6; as equalizing factor, 6–7; as factor in class endogamy, 81–82; assortative mating by, 98–112, 116; related to fertility, 98–112, 200; related to sixth-grade IQ values, 116; selection for, 116; of wife, in family-planning clinic in Pakistan, 241

Endogamy: defined, 76; effect of, in Slovakia, 274

—class: and propinquity as factors in mate selection, 79; as explanation for assortative mating, 81–82

—racial: in America, 82

Environment: effects on growth, 12–20 *passim;* bias of, in twin studies, 34–40; and heritable change in R-locus expression in maize in (abs.), 66; interaction with heredity, 74–75; effect on assortative mating, 92–94. *See also* Evolution

Evolution: cultural, 73–75; organic, 73–75; viewed in parallel, 73–75; consequences for, of assortative mating, 136, 138

Exogamy: identified, 76; racial, 82–83

FAMILY: technique for measuring desired size and composition of, 164–172; composition of, in Venezuela, 177–189; influence on interest in family planning, Pakistan, 241; comparison of the size of, of Roman Catholics and non-Catholics in Great Britain (abs.), 307

—extended: defined, 177*n;* in Venezuela, 178–179

—nuclear: defined, 177*n;* in Venezuela, 178–179

—planning: in Pakistan, 235–251. *See also* Contraception; IUCD

Fecundability. *See* Fertility

Feinberg, William E., 155–163

Felsenstein, Joseph, 85–97

Ferák, V., 273–276

FERMOD: analysis of U.S. fertility based on, 155–162

Fertility: and assortative mating by educational attainment, 104–112; and assortative marriage by intelligence, 120–125; and assortative mating by physical characteristics, 136–138; probability analysis of, in U.S., 155–162; technique for measuring desired family size and composition, 164–172; in Venezuela, 178, 182–186; and age at remarriage in Venezuela, 180; and occupational status, 199, 200, 201; and intelligence, 199, 200, 201; and size of family of origin, 199; and educational attainment, 200; and female working roles (abs.), 219–220; and husband's occupation, 236; related to parity in family planning, 247; recent trends in Europe (abs.), 307; social and psychological correlates of urban (abs.), 308

—cumulative: of married women, in Venezuela, 184–186 *passim;* of Venezuelan women in consensual unions, 184–186

—differential: as evidence of incipient decline in a developing country (abs.), 220; and female educational attainment, 223; and socioeconomic status, 224; by color, 224, 225

Fraser, G. R., 209

Freire-Maia, Dértia Villalba, 51–54

Freire-Maia, Newton, 22–33

Friedmann, A. I., 209

GALTON'S LAW OF FILIAL REGRESSION, 126

Gametic selection: effect of on genetic load, 194–195

Garrison, Robert J., 113–127

Gene, albino: effects on behavior of mice (abs.), 66

—pool: assortative mating and changes in, 72

—substitution: possible rates of, in evolution (abs.), 305

Genetic load: and treatment of congenital diseases, 191–196

Genetics: future of, 144–145; status of, in U.S.S.R., 290

Genetics of Gastro-Intestinal Disorders, The, 58–59

Genetics of Neurological Disorders, The, 148

Genotype: why does it not congeal? (abs.), 69; role of, in mate selection, 74, 75; and inheritance of elements of behavior (abs.), 219

Glucose-6-phosphate dehydrogenase deficiency: in Hungary (abs.), 69

Green, Lawrence W., 235–251

Grönberg, A., 212–214

Growth: spurts, 18; and ethnic differences in bodily proportions, 18–20; effect of inbreeding, 275

Growth Regulating Substances for Animal Cells in Culture, 302

HAGEMAN LOCUS: probable location of, on an autosome (abs.), 306

Heat: resistance of proteins, 204–205; and plant cells, 205

Heredity: effects on growth, 12–20 *passim;* interaction with environment, 74–75. *See also* Inheritance

Heterogamy: identified, 76, 113

Heterogeneity: in genetic control of phenylalanine metabolism in man (abs.), 305

Heterosis: in human populations, 20; defined, 273; related to growth and stature, 273

Heterozygosity: estimated in man (abs.), 67

Hiernaux, Jean, 12–21

Himwich, H. E., 57–58

Homogamy: identified, 76, 113; effects of, 113; correlation of, for stature, related to fertility, 128–135; for anthropological types, in Polish families, 135–136; for age in Ramah Navaho Indians, 138

—social: influence on mate selection, 78–83 *passim*

Homozygosity: effect of assortative mating on, 85; effect of inbreeding on, 85

Hormones and Behavior: An Enduring Problem in Psychology, 59–60

Hybridization: of human-mouse cell lines (abs.), 67; identified, 76

Hypergamy: identified, 76

Hypogamy: identified, 76

IDIOPATHIC SCOLIOSIS: genetic and environmental aspects (abs.), 68

Inbreeding: in U.S., 22–28, 29–32 *passim;* in Canada, 28, 32; in Latin America, 28–31 *passim;* contrasted with assortative mating, 76, 85–86; consequences of, 85; effects of, 85, 141; genetic definition of, 142

Incest: identified, 76; reasons for occurrence of, 117

Income: and education, 9; and family background, 9; and family planning in Pakistan, 238

India: IUCD use in, 41–50; assortative marriage by caste in, 125; strategies to raise Mother's Age in, 254; forms of age-specific birth rates by orders of birth in, 267

Indian, American: further studies on the Xavante Indians (abs.), 67–68; assortative mating with respect to body size in Ramah Navahos, 138; genetic studies of tooth-size factors in Pima Indian families (abs.), 219; congenital defects in, 229

Indiana: Jewish marriage patterns in, 277; Marriage Record Form, 277

Infectious hepatitis; and Down's Syndrome (abs.), 218

Inheritance, mammalian, 306

Inmarriage: of Jews in Indiana, 278. *See also* Intermarriage; Marriage; Remarriage

Intelligence: and father's education, 2, 3, 5; and educational attainment, 3, 4, 6, 8, 116; and family size, 3; and father's occupation, 5; explanation of, 8; dimensions of variations in, 75; and racial exogamy, 83; assortative mating and evolution of, 113; related to assortative mating, 115–117 *passim;* and fertility, 120–125, 199, 200, 201; effect of assortative marriage on genetic basis of, 125–126

—regression: and social mobility, 1, 10

—tests: Armed Forces Qualification Test, 2, 4; Haggerty Intelligence Examination, 3; Army General Classification Test, 4; Stanford-Binet, 5; Terman Group, 116, 198

Interbreeding: identified, 76

Intermarriage: definition, 76, 277; of Jews in Indiana, 278. *See also* Inmarriage; Marriage; Remarriage

Introduction to Animal Physiology and Physiological Genetics, 148–149

Isolate sizes: and inbreeding, 28–31; and migration, 29–31

IUCD: use of, in India, 41–50. *See also* Contraception; Family planning

JACOBS, P. A., 211–212

Japanese: congenital defect frequencies among, 228

Johnson, Roswell H., 56

Jung, Carl: and unconscious archetype theory, 77

Jung J., 212–214

KALAMAZOO FERTILITY STUDY: follow-up on, 198–203

Kaplan, Arnold R., 288

KAP surveys: deficiencies in, 164

Kare, Morley R., 209–211

Karger, S., 146–147

Karyotype analysis: statistical problems in (abs.), 218

Kety, S. E., 57–58

Kirk, Dudley, 141–143

Kiser, Clyde V., 98–112, 221–226

Krótki, Karol J., 235–251

Kuttner, Robert E., 298

LALOR FOUNDATION, 296

Larsson, T., 212–214

Latin America: inbreeding in, 28–29, 30–32 *passim. See also* Puerto Rico; Venezuela

Levin, Samuel M., 214–215

Lewontin, Richard, 141–143

Lichardová, Z., 273–276

Light, Robert E., 215–216

Lindeluis, A., 146–147

Linkage: autosomal, 67; relations of the phosphoglucomutase PGM_1 locus in man (abs.), 67

MCCONNELL, R. B., 58–59

Maller, Owen, 209–211

Malthus and the Conduct of Life, 214–215

Malthusian parameter, 200

Marriage: trends in, in Venezuela, 179–182,; dissolution of, in Venezuela, 186; effects of delaying first birth by postponing, 254; texts on, rated, 260; patterns, of Jews in Indiana, 282; on measuring squeeze of (abs.), 307. *See also* Inmarriage; Intermarriage

Mate selection, theories of: unconscious archetype, 77; parent image, 77; principle of complemetnary needs, 78; propinquity and interaction, 79–80; exchange theory, 80; values and belief patterns, 80; social stratification and class endogamy, 80–82; ethnic solidarities, 82–83

Mating, preferential, 113
—selective: consequence of, 141; definition of, 141
Maturation, dental: genetic influence on, 14, 16; and environmental conditions, 14–16; in European populations, 14, 15; in African populations, 14, 15; in Pima Indians, 15
—sexual: genetic influence on, 16; effect of environmental conditions on, 16–18; in Cuba, 17; in Africa, 17–18
—skeletal: genetic influence on, 13; effect of environmental conditions on, 13–14; variations in, between African and American populations, 13–14
Mead, Margaret, 215–216
Mental retardation: assortative mating for, 117
Mesalliance: identified, 76
Migration: and inbreeding, 29–31; effect of, on family composition in Venezuela, 178–189
Minnesota: assortative marriage by intelligence and fertility in, 120–125
Minnesota Multiphasic Personality Inventory, 115, 201
Miscegenation: identified, 76, 83
Mobility, social: and the anthropological structure of populations (abs.), 218
Moore, Keith L., 216–217
Morphology: heritable morphological difference between the two chromosomes No. 16 in humans (abs.), 67
Mortality: and age of remarriage in Venezuela, 180, 181
Mother's Age, at first birth: effects of delaying, by birth control, 254; effects of delaying, by postponing marriage, 254; population effects of, 254; strategies to raise, 254; medical effects of raising, 255; economic effects of, 258; marital and psychological effects of, 258
Multiple Births: United States, 1964, 152
Mutations: the chemical production of (abs.), 66–67; mutagenic capacity of adenoviruses for mammalian cells (abs.), 153
Myers, George C., 164–172

National Center for Health Statistics, 152
Negroes: fertility rates of, 221; congenital defect frequencies among, 228
Niswander, Jerry D., 227–234
Nongenetic transmission: of information (abs.), 66
NORC Occupational Prestige Index, 199
Norrie's Disease: A Congenital Progressive Oculo-acoustico-cerebral Degeneration, 304

Occupational Achievement: contributory factors, 6; and educational attainment, 8; and father's occupation, 8; and ability, 9
—status: correlations of, 5; related to fertility in Kalamazoo study, 199, 200, 201; of husbands, related to interest in family planning, 236; of husbands, related to fertility rates, 236
Overdominance in fitness: effect of, on genetic load, 191–194

Pakistan: study of biases in family-planning programs in, 243
Pantelouris, E. M., 148–149
Parity: related to fertility in family planning, 246; related to marriage duration, 247
Pearsonian correlation coefficients: difficulty of use of, with polytomies, 116, 117
—curves: fit distribution of mothers' ages at various birth orders, 267
Penetrance: of a rare genetic defect (abs.), 68–69
Personality: similarities in co-twins, 36–37
Phenotype: role of, in mate selection, 75
Phenylalanine: heterogeneity in genetic control of metabolism of, in man (abs.), 305
Phenylketonuria: possible causes of, 195
Phenylthiocarbamide: ability to taste, affected by smoking, 51–53
Pohlman, Edward, 252–263
Polymorphisms: and overdominance in fitness, 191–194; and gametic selection, 194–195
Polytomy: identified, 116; treatment of, with G statistic, 118–119
Population: accuracy of census counts of, in U.S. 73–76; accuracy of Selective Service registration figures for, 173–176
Potter, Robert G., 155–163
Pratt, R. T. C., 148
Premarital conception: effects of, 261
Princeton Fertility Study, 155–162
Project Talent, 201
Puberty. *See* Maturation, sexual
Public Health and Population Change, Current Research Issues, 150–152
Puerto Rico: preferential family size and composition in, 165–172

Race and Modern Science, 298–301
Radiation: dominant effects of, in mouse populations (abs.), 305
Reed, Sheldon C., 113–127
Remarriage: age at, in Venezuela and U.S., 180; among Jews in Indiana, 285
Report of the United Nations Scientific Committee on the Effects of Atomic Radiation, 60–63
Research on Genetics in Psychiatry, 147–148
Ridley, Jeanne Clare, 150–152
Roberts, John M., 164–172
Rosenthal, Erich, 277–287
Russia. *See* U.S.S.R.

Sakoda, James M., 155–163
Scarr, Sandra, 34–40
Schizophrenia: assortative mating for, 117; Moscow conference on, 288; dermatoglyphics of childhood (abs.), 306
Science and the Concept of Race, 215–216
Segregation ratio: estimation of (abs.), 69
Selection, sexual, 113. *See also* Assortative mating
Selective Service: accuracy of registration figures of, 173–176; history of, 174–175

Sex: secondary sex ratio in families with X-chromosomal disorders (abs.), 68; composition of family, as factor of family size, 164–171
Sex Chromatin, The, 216–217
Sharma, Archana, 149–150
Sharma, Arun Kumar, 149–150
Sheps, Mindel C., 150–152
Shuey, Audrey M., 63–65
Sickle-cell anemia, 195
Smoking: effects of, on ability to taste PTC, 51–53
Smythies, J. R., 57–58
Spuhler, J. N., 128–139
Stature: assortative mating for, related to fertility, 128–135; effect of inbreeding on, 273
Sterility: and change in Mother's Age, 257
Stoker, M., 302
Study of the Population Movement in Nine Swedish Subpopulations in 1800–1849 from the Genetic Statistical Viewpoint, 146–147
Subfecundity, 257

TALWAR, PREM P., 264–272
Tay-Sachs disease, 195
Teeth: genetic studies of tooth-size factors in Pima Indian families (abs.), 219
Testing of Negro Intelligence, The, 63–65
Third Harvard Growth Study, 201
Tobach, Ethel, 215–216
Tough, I. M., 211–212
Turner, John R. G., 191–197
Twins: comparison of monozygotic co-twins, 34–40; comparison of dizygotic co-twins, 34–40; MMPI used with parents of, in Boston, 115; in Ann Arbor study, 137; frequency of, among races, 232; the Danish twin register (abs.), 306

UNITED STATES: inbreeding in, 22–28, 29–31
U.S.S.R.: cytoecology in, 204; Symposium on Biological Research in Schizophrenia, 288

VAN DER KLOOT, WILLIAM G., 208–209
Variance: genes that influence the variance of a quantitative character and their possible effects on selection (abs.), 69; assortative mating and distribution change, 71–72
Venezuela: study of family composition in, 177–189
Vineland Social Maturity Scale: used to compare co-twins, 35, 36, 39, 40

WARBURG, M.,
Whalen, Richard E., 59–60
World Health Organization, 147

YERGANIAN, G., 301

ZELNIK, MELVIN, 173–176
Zygosity: mistakes in, used to determine environmental bias, 37–40. *See also* Heterozygosity; Homozygosity

CONTENTS

Eugenics Quarterly, Volume 15, 1968

No. 1 (March)

ABILITY AND ACHIEVEMENT, Otis Dudley Duncan 1

ETHNIC DIFFERENCES IN GROWTH AND DEVELOPMENT, Jean Hiernaux. 12

INBREEDING LEVELS IN AMERICAN AND CANADIAN POPULATIONS: A COMPARISON WITH LATIN AMERICA, Newton Freire-Maia 22

ENVIRONMENTAL BIAS IN TWIN STUDIES, Sandra Scarr 34
